

Biographical Sketch

JC Martin
Project Manager
Clean Transportation
San Diego Gas & Electric Company

JC Martin has over 22 years of energy industry experience. His current duties focus on integrating electric vehicle charging into SDG&E's T&D, Demand Response, and Smart Grid systems to provide customers with increased choice, convenience, and control of their energy use and costs.

This work draws upon JC's broad experience in the electricity and oil industry. His relevant prior work experience includes Home Area Network implementation for 1.4 million customers as part of SDG&E's Smart Meter deployment, tariff development for demand response rates and programs, wholesale electricity trading and scheduling, measurement and evaluation of demand side management programs, as well as, load research of customer's energy use. His education is in the general area of resource economics, with degrees from Cornell & Purdue University.
