

**Kevin Cornish**

Is an executive consultant at Enspira Solutions, a Black & Veatch company with 25 years of experience in the utility field, with particular expertise in smart metering and advanced metering infrastructure (AMI) solutions, demand response and energy efficiency programs, and smart grid and related technologies. He has led strategy and business case development for utilities examining the full breadth of AMI solutions: AMI technology, MDMS, demand response, distribution automation, and implementation requirements. Mr. Cornish worked at Pacific Gas & Electric Company in a variety of engineering and management positions over a 13 year period. He then spent 10 years with various advanced metering solution providers, including 2 years as full-time vendor project manager for a large smart metering project. Mr. Cornish holds a BS in Electrical Engineering/Computer Science, an MS in Electrical Engineering/Power Systems, and an MBA in Marketing and Telecommunications Management.
