

Mark Podorsky

Manager
SmartConnect Business Design
Edison SmartConnect™
Southern California Edison

Mark Podorsky is the manager of SmartConnect Business Design in Business Integration for Edison SmartConnect, Southern California Edison's (SCE's) award-winning program to replace the company's 5.3 million electricity meters with "smart" meters that will enable customers to better manage their energy use and allow SCE to better manage its electricity grid. Mark's responsibilities include managing the overall design and integration of Edison SmartConnect products and services as well as business processes.

Expected to cost more than \$1 billion and to take 4 years to complete, the Edison SmartConnect program is a major undertaking expected to reduce green-house gas emissions in California while contributing to a more reliable power grid.

Mark joined SCE in 2009. He is an accomplished executive with twenty years of business operations and systems experience within the energy industry, most recently as Vice President of Operations for Commerce Energy, Inc.

Podorsky holds a BS degree in Mathematics from Loyola University of Chicago.
