

Robert (Bob) B. Frazier

Directory of Technology – Houston Electric

CenterPoint Energy, Houston Texas

Bob has 34 years of IT management experience in Computer Operations, Data Security, Audit, Executive Consulting and all venues of System Development including SAP ERP, CCS, Customer Support Center, Mobile Data, Engineering applications and IT support software. At CenterPoint Energy, his focus is on systems supporting the electric division including the pilot AMI and Smart Grid currently being deployed. In addition to the usual strategic planning and tactical execution of systems supporting the electric utility, Bob focuses on future potential systems exploiting the AMI and SG infrastructure.

Bob was a member of the Texas statewide meter portal specification and selection teams, the DOE grant drafting team, the CNP Intelligent Grid specification team and past president of the AITP Houston Chapter. He spent six years as a US Navy Supply Officer and 14 years in the reserves. He has a B.S. in Computer Systems Analysis from Miami U. in Oxford, OH and an MS in Operations Research / System Analysis from US Naval Postgraduate School in Monterey, CA. He is married to Melissa with two boys in college or grad school.
